Unique “Clued In™” Word Puzzle Now Available on the iPhone, iPod touch and iPad

Clued In™ word puzzle app previously developed for Blackberry has now been ported to the Apple platform.

Los Angeles, CA (April 29, 2011) – Get Clued In, LLC, mobile game publisher announces today the availability of *Clued In™* word puzzle for iPhone, iPod touch and iPad – a must have game for crossword puzzle fanatics. *Clued In™* is an acrostic puzzle in which players reveal the puzzle’s principal clue (in the grid at the top of the game screen) by solving a series of individual crossword style clues (at the bottom of the game screen). The initial letters of those individual answers also spell out a hint to the puzzle’s final answer. *Clued In™* is easy to learn and will become a favorite pastime for young and young at heart players. The *Clued In™* app contains 25 engaging puzzles with each puzzle taking between 15-20 minutes to complete.

Encouraged by the popularity of his puzzles and games constructed for family get-togethers and other holiday celebrations, James Melman, *Clued In™* app creator, decided to bring his puzzles to the masses to enjoy and have fun playing. “As an avid puzzle solver myself, over the years I have constructed dozens of original, custom puzzles for friends and family to enjoy at holidays and special occasions,” Melman states. “With the *Clued In™* app, I hope to provide word puzzle fans an entertaining way to spend a few minutes while, for example, commuting on the train or during air travel - the goal is to give someone a smile and sense of satisfaction in completing the puzzle,” he adds.

Melman concluded that the best way to proceed would be to design a puzzle format that can be solved on mobile phones, where games are becoming so popular. *Clued In™* was developed originally on the Blackberry and had over 10,000 downloads. Now, working with Aptology Inc., to port *Clued In™* to the Apple platform, people with an iPhone, iPad or iPod Touch can enjoy it, too.

Clued In™ is simple to learn and the goal is clear. Progress toward the solution is always visible, and there is a “hint” button to help if the player gets stuck and a “check for errors” button to reveal mistakes. The puzzles also are a good way of giving your brain a workout, to keep a sharp mind longer in life.

The *Clued In™* app ad-free version is available for iPhone, iPad and iPod Touch on the Apple iTunes App Store for \$0.99 at <http://itunes.apple.com/us/app/clued-in/id429863047?mt=8> or, there is a free version with ad content, <http://itunes.apple.com/us/app/clued-in-free/id429915165?mt=8>. Each version contains the same 25 puzzles. There are plans to adapt *Clued In™* for other tablets and for the Android platform too.
